DIAMOND PRODUCT

the Original is Here

The bitterness of the copie's low quality,
remains longer than the sweetness of low price.

Get the Original, ARIX.

The Best Diamond Array Products in the World

ARIX, the original technology of diamond array adapted to serial production SINCE 2005 has come with 2010 follow-up ARIX Generation-II with more enhanced metallurgy, more precise control over diamond positions and more esthetical and functional design of diamond segments for each product range

Arix Diamond Blade

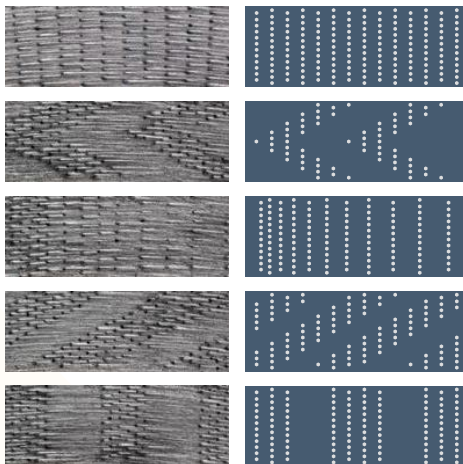

It is almost impossible to find one perfect solution of diamond tools that is the best for every case no matter what you are in need of. However, what if it is possible to find a way to realize one perfect solution for each case? ARIX Technology is to place diamond grits precisely in three dimensional patterns and to deliver the best performance to you in all cases.

(Control the space among diamond grits, wide (L0) or narrow (L1), as you want)

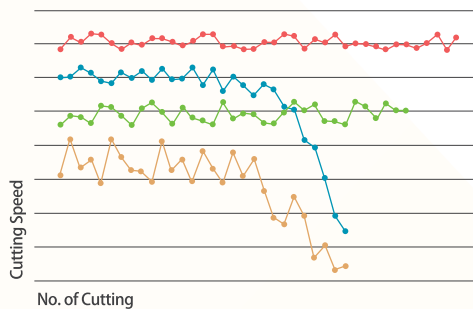

Functional Arrangement of Diamond Grits

The three dimensional patterns that ARIX Technology can arrange diamond grits in are various as you find some examples below.

We wouldn't blame you even if you call ARIX an art rather than a technology.

Comparison Chart

See how different the cutting performance of ARIX products is from those of other diamond cutting tools. It is faster, more stable, and more sustainable.

- ARIX Technology
- Normal fast cut design
- Normal sustainable cut design
- Conventional products
