

### A Revolutionary Mixer In Construction

### Technical Specifications

Model	
Motor Power	2HP
Voltage	240 V 50Hz (1-phase electric)
Drum Capacity	200liter
Drum Size	90cm(3') dia x 35cm(1'2") depth
Overall Size	95cm(3'1") width x 010cm(3'3") height
Rotation Speed	32rpm
Weight	100kg

### Description

The U95 Single Phase Electrical Steel Mixer is the latest product in electrical steel mixer, specially designed for use in the construction industry. The rotary method of the motor is implemented to obtain larger speed reduction of the gear box in order to provide greater torsion. This mixer rotary method protects the gear box and extends the life span of the motor.

### Benefits

- No sound & air pollution
- No diesel
- Low consumption of electricity
- Easy to maintain
- Mixer drum & machine mounting are able to separate for handling
- Extremely handy to move
- Time and cost saving
